THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 66-69, 1986

(A translation of *Teoreticheskaya i Matematicheskaya Fizika*)

Volume 66, Number 1 January, 1986

	Engl./Russ.	
Inequality of the Passive Gravitational Mass and the Inertial Mass of an Extended Body – V. I. Denisov, A. A. Logunov, and Yu. V. Chugreev	1	3
Discrete Vacuum Superselection Rule in Wightman Theory with Essentially Self-Adjoint Field Operators – A. V. Voronin	8	13
Real Finite-Gap Regular Solutions of the Kaup–Boussinesq Equation – A. O. Smirnov	19	30
Integrability Conditions for Systems of Two Equations of the Form $u_t = A(u)u_{xx} + F(u, u_x)$. II – A. V. Mikhailov and A. B. Shabat	31	47
Production of Fermion Pairs Associated with Decay of a Metastable Vacuum – G. V. Lavrelashvili, V. A. Rubakov, and P. G. Tinyakov	44	66
Scalar Fields and Dynamical Torsion in Kaluza–Klein Theories – I. V. Volovich and M. O. Katanaev	53	79
Bäcklund Transformations for Superextensions of the Liouville Equation – E. A. Ivanov and S. O. Krivonos	60	90
Superconformal Algebras in Two Dimensions – V. G. Knizhnik	68	102
Description of Limit Gibbs States for Curie–Weiss–Ising Model – I. G. Brankov, V. A. Zagrebnov, and N. S. Tonchev	72	109
Construction of Theory of a Binary Mixture of Nonideal Bose Gases (or Liquids) by the Method of Collective Variables. I. Wave Function and Ground-State Energy, Excitation Spectrum, Correlation Functions, Thermodynamics of the System at T = 0 – G. O. Balabanyan	81	121
Simple Proof that an Adiabatic Invariant is Conserved to Exponential Accuracy Over a Complete Interval of Development – A. N. Vasil'ev and M. A. Guzev	97	146
Experimental Confirmation of Relativistic Theory of Gravitation in the Delay of Radio Signals – A. A. Logunov and Yu. M. Loskutov	99	150
Proof of the Invariance of the Bethe-Ansatz Solutions under Complex Conjugation – A. A. Vladimirov	102	154

Volume 66, Number 2 February, 1986

Gravitational Collapse in the Relativistic Theory of Gravitation – A. A. Vlasov and A. A. Logunov	107	163
Infrared Divergences in Theories with Massless Scalar and Spinor Fields – A. Yu. Kamenshchik and N. A. Sveshnikov	115	174
Stochastic Quantization in Field Theory with a Fundamental Mass – G. G. Petriashvili	123	188
Effective Lagrangian in Supersymmetric Quantum Chromodynamics – A. A. Slavnov	129	197
Algebraic Method of Constructing and Analyzing Spontaneous Compactification Models – D. V. Vasilevich and V. D. Lyakhovskii	135	206
Scattering in Conformally Invariant Quantum Mechanics – A. I. Oksak	142	216
Two-Dimensional Hydrogen Atom. Reciprocal Expansions of the Polar and Parabolic Bases of the Continuous Spectrum – L. S. Davtyan, G. S. Pogosyan, A. N. Sisakyan, and V. M. Ter-Antonyan	146	222
Construction of Two-Dimensional Schrödinger Operator with Given Scattering Amplitude at Fixed Energy – R. G. Novikov	154	234
Dynamical Structure Factor of a Fluid in Nonequilibrium Steady States – V. G. Morozov	158	241
Non-Markov Theory of Sudden Modulation – A. I. Burshtein, A. A. Zharikov, and S. I. Temkin	166	253
Scale-Invariant Description of the Critical Region in the Method of Integral Equations for		

the Correlation Functions – A. L. Blokhin and A. V. Chalyi	173	264
Fluctuation Effects in the Spherical Model – Yu. M. Ivanchenko, A. A. Lisyanskii, and A. É. Filippov	183	278
Thermodynamics and Anomalous Slowing Down of Molecular Structure Relaxation in a Flat Channel – E. V. Kholopov	191	290
Relaxation Processes in Multiatomic Gases. I – L. A. Pal'tsev	199	302
Thermodynamics and Equations of Motion of Quantum Crystals – N. M. Lavrinenko and S. V. Peletminskii	207	314
Asymptotic Properties of the Solutions of a Multicomponent Linear Conjugation Problem – O. V. Meunargiya	215	326
Coexistence of Phases in a Multicomponent Lattice Liquid with Complex Thermodynamic Parameters – S. A. Pirogov	218	331

Volume 66, Number 3 March, 1986

Second Quantization and Pseudodifferential Operators – A. Yu. Khrennikov	223	339
Method of Special Embeddings for Grand Unification Models – D. V. Vasilevich and V. D. Lyakhovskii	231	350
Multiplicative Renormalization of Two-Dimensional Chiral Theories. I – A. V. Bratchikov and I. V. Tyutin	238	360
Diagram Technique of 1/N Expansion in a Matrix Model of Field Theory – N. V. Goncharov and A. A. Slavnov	243	368
Generalization of the Gross–Neveu Model to the Case of Several Coupling Constants – K. G. Klimenko	252	381
Effective Method for Calculating the Phase Shifts for the Scattering of Slow Particles with Nonzero Orbital Angular Momentum – Yu. M. Bruk	260	392
Relativistic Energy Spectrum of a Bound System of Two Particles. Local Quasipotential Equation – A. P. Martynenko and R. N. Faustov	264	399
Path Integrals in Configuration Space in Weakly Relativistic Many-Body Theory – L. F. Blazhievskii	270	409
Quantum Measurement Noise for Observation of a Particle in a Magnetic Field – G. A. Golubtsova	279	422
Uniqueness and Half-Space Nonuniqueness of Gibbs States in Czech Models – S. B. Shlosman	284	430
Relaxation Processes in Multiatomic Gases. II – L. A. Pal'tsev	294	445
Quantum Nonlinear Schrödinger Equation on a Lattice – N. M. Bogolyubov and V. E. Korepin	300	455
Bogolyubov Generating Functional Method in Statistical Mechanics and the Analog of the Transformation to Collective Variables – N. N. Bogolyubov (Jr) and A. K. Prikarpatskii	305	463

Volume 67, Number 1 April, 1986

Orbital Period of a Satellite of a Planet in the Relativistic Theory of Gravitation and in General Relativity and the Possibility of Experimental Verification of Delay Due to Gravitational Interaction – A. A. Logunov and Yu. M. Loskutov	319	3
Relativistic Quantum Theory of Spinor Particles in a Gravitational Field – A. A. Logunov and Yu. M. Loskutov	323	9
Cluster Properties of Classical Lattice Spin Systems with Vacuum – V. A. Arzumanyan, B. S. Nakhapetyan, and S. K. Pogosyan	331	21
Duality Principle for Percolation in Random Fields on a Plane – A. K. Stepanov	339	32
Solution of Quantum Gel'fand–Levitan–Marchenko Equations for the Sine–Gordon Model in the Soliton Sector for $\gamma = \pi/\nu$ – F. A. Smirnov	344	40
Minimal R Operation in the 1/N Expansion of σ Models – V. K. Krivoshchekov and P. B. Medvedev	351	52
Generalized Coherent States for Relativistic Model of a Linear Oscillator – N. M. Atakishiev and R. M. Mir-Kasimov	362	68
Conformal Invariance in Gauge Theories. II. Yang–Mills Theory – R. P. Zaikov	368	76
One-Plaquette Model with Fermions in the Framework of the Topological Expansion		

– S. I. Azakov and É. S. Aliev 376 89
Front Form of Relativistic Lagrangian Dynamics in Two-Dimensional Space–Time and its Connection with the Hamiltonian Description – S. N. Sokolov and V. I. Tretyak 385 102
Method of Time-Ordered Products in Polaron Theory – N. N. Bogolyubov (Jr), A. N. Kireev, and A. M. Kurbatov 394 115
Fluctuation Dispersion of Transport Coefficients in a Bose Superfluid – V. G. Morozov 404 129
Critical Behavior and Finite Volume – Yu. M. Ivanchenko, A. A. Lisyanskii, and A. É. Filippov 413 143
Nonrelativistic Limit of Solutions of Radial Quasipotential Equations – Vu Xuan Minh, E. P. Zhidkov, and V. G. Kadyshevskii 418 151

Volume 67, Number 2 May, 1986

Contradictory Character of General Relativity. The Relativistic Theory of Gravitation – A. A. Logunov and Yu. M. Loskutov 425 163
Percolation in Random Fields. III – S. A. Molchanov and A. K. Stepanov 434 177
Renormalization by Asymptotics in the Case of Spinor Fields – A. V. Selikhov and D. A. Slavnov 440 186
Gauge Fields and Correspondence Principle – A. A. Andrianov and Yu. V. Novozhilov 448 198
Quasienergy Integral for Canonical Maps – V. V. Sokolov 464 223
Elementary Excitations in Anisotropic Narrow-Band Magnetic Semiconductors – M. Sh. Erukhimov and S. G. Ovchinnikov 473 237
Theory of SIS Structures with Ordered Magnetic Impurities in the Barrier Region at Near-Critical Temperatures – S. V. Kuplevakhskii and I. I. Fal'ko 483 252
Solution of the System of Lorenz Equations in the Asymptotic Limit of Large Rayleigh Numbers. II. Description of Trajectories Near a Separatrix by the Matching Method – L. A. Pokrovskii 490 263
Equilibrium Equations for the Class of Continuous Systems with Positive-Definite Two-Body Interaction – R. Gielerak 507 289
Remark on the Propagation-of-Molecular-Chaos Theorem – I. D. Chueshov 517 304
Covariant Quantization of Gauge-Invariant String Field Theories – I. Ya. Aref'eva and I. V. Volovich 521 309
Quadrupolar Glass Model with Arbitrary Distribution of the Coupling Constants – E. A. Luchinskaya 524 314

Volume 67, Number 3 June, 1986

Gauge Transformation in the Relativistic Theory of Gravitation – A. A. Logunov and M. A. Mestvirishvili 529 323
Singular Solutions of the Liouville Equation on an Interval – S. V. Talalov 537 336
Gauge-Invariant Variables and Infrared Confinement in QCD – R. I. Azimov and V. N. Pervushin 546 349
Renormalizations in a Matrix Field Theory Model in the 1/N Expansion – N. V. Goncharov 554 361
Invariant Regularizations in Gauge Theories. I. Abelian Theories – O. I. Zav'yalov 565 378
Baryon String Model. III. Quantum Theory of Single-Mode Configurations of a Three-String – M. S. Plyushchai, G. P. Pron'ko, and A. V. Razumov 576 396
Complete Integrability of the Nonlinear Ito and Benney–Kaup Systems: Gradient Algorithm and Lax Representation – N. N. Bogolyubov (Jr) and A. K. Prikarpatskii 586 410
Dynamic and Kinematic Interaction of Magnons in an Antiferromagnet – V. G. Bar'yakhtar and Yu. A. Sitenko 597 426
Bethe Method: Thermodynamics and Limit States – E. V. Gusev 606 440
Thermodynamics of a One-Dimensional Lattice Bose Gas – N. M. Bogolyubov 614 451
Solvable Model of Quadrupole Glass with Axial Interaction – E. A. Luchinskaya, V. N. Ryzhov, and E. E. Tareeva 623 463
Phase Transitions in One-Dimensional Hubbard Model with Degeneracy – A. V. Vedyaev, M. E. Zhuravlev, and V. A. Ivanov 627 470
Gauge-Invariant Action of Interacting Bosonic Strings – I. Ya. Aref'eva and I. V. Volovich 630 474

Volume 68, Number 1 July, 1986

Nonconservation of the Fermion Number and the Limiting Density of Fermionic Matter (Two-Dimensional Gauge Model) — V. A. Matveev, V. A. Rubakov, A. N. Tavkhelidze, and V. F. Tokarev	635	3
Dense Point Spectra of Schrödinger and Dirac Operators — S. N. Naboko	646	18
Diagrams in the Polaron Model — M. A. Smondyrev	653	29
Induced Potential and Klauder Phenomenon for Even Confinement Potentials with Singularity λx^{-2} — V. B. Gostev, V. S. Mineev, and A. R. Frenkin	664	45
A Dynamical System with Infinitely Many Degrees of Freedom and Solution of the Frenkel'—Kontorova Problem — L. D. Pustyl'nikov	673	58
Evolution Operator for the Bogolyubov (BBGKY) Hierarchy. Lattice Systems — A. K. Vidybida	681	69
Correlation Functions for Anisotropic Heisenberg Model in Zero Magnetic Field — R. R. Nigmatullin and V. A. Toboev	694	88
Unruh Effect and Reducibility of the Representation of the Commutation Relations — N. Sh. Urusova	702	99
Exact Solution for the Partition Function of a System of Interacting Fermions — M. P. Zhelifonov and B. S. Nikitin	707	106
Kinetic Equations for a Dynamical System in a Condensed Medium and a Strong External Field — É. G. Petrov	714	117
Phase Diagram of the ANNNI Model at Low Temperatures. I. Rigorous Results — A. E. Mazel'	722	128
Coherent Dynamics of a System of Coupled Bose and Fermi Oscillators — M. B. Shirshov and V. S. Yarunin	731	141
Vlasov Limit of the Correlation Functions of the Grand Canonical Ensemble — A. A. Arsen'ev	737	151
Excited States in Logarithmic Perturbation Theory — G. V. Vikhnina and V. S. Pekar	740	155

Volume 68, Number 2 August, 1986

Conservation Laws of Evolution Systems — V. V. Zharinov	745	163
Solitons of the Nonlinear Schrödinger Equation Generated by the Continuum — V. P. Kotlyarov and E. Ya. Khruslov	751	172
Stochastic Regularization and Renormalization — E. Sh. Egoryan and R. P. Manvelyan	762	187
Propagation of Waves in a Randomly Inhomogeneous Medium with Strongly Developed Fluctuations. I. Renormalization Group and $4 - \varepsilon$ Expansion — L. Ts. Adzhemyan, A. N. Vasil'ev, and Yu. M. Pis'mak	770	198
Regular Expansion for Calculation of the Renormalization-Group Functions in a Theory with Dimensional Coupling Constants — M. Yu. Nalimov	778	210
Higgs Potentials as "Inheritance" from Higher Space-Time Dimensions. I. Dimensional Reduction and Scalar Fields — I. P. Volobuev and Yu. A. Kubyshin	788	225
Explicit Form of Non-Abelian Self-Consistent Chiral Supersymmetric Anomaly — V. K. Krivoshchekov, P. B. Medvedev, and L. O. Chekhov	796	236
Analog of Levinson's Formula for a Schrödinger Operator with Long-Range Potential — A. A. Kvitsinskii	801	244
Inelastic Transitions in Collisions of Multidimensional Harmonic Oscillators — A. I. Denisenko and G. V. Dubrovskii	809	255
Virtual Levels of n-Particle Systems — G. M. Zhislin	815	265
Kinetics of Heterogeneous Condensation in the Case when Supersaturation is Created Instantaneously — F. M. Kuni, T. Yu. Novozhilova, and I. A. Terent'ev	823	276
Phase Diagram of the ANNNI Model at Low Temperatures. II. Rigorous Results — A. E. Mazel'	832	287
Hierarchies of Moment Equations for the Solution of the Schrödinger Equation with Random Potential and their Closure — R. V. Bobrik	841	301
Bar'yakhtar-Krivoruchko-Yablonskii Representation and Thermodynamics of Magnetically Ordered Systems — T. N. Antsygina and V. A. Slyusarev	848	312

Volume 68, Number 3 September, 1986

Propagation of Waves in a Randomly Inhomogeneous Medium with Strongly Developed Fluctuations. II. Infrared Representation and Large-Distance Behavior — L. Ts. Adzhemyan, A. N. Vasil'ev, and Yu. M. Pis'mak 855 323
Heisenberg Fields in the Neighborhood of a Classical Solution — V. B. Tverskoi 866 338
On the Motion of Solitons in Discrete Molecular Chains — A. A. Vakhnenko and Yu. B. Gaididei 873 350
Quantization of Yang-Mills Fields in the $A_0 = 0$ Gauge — A. A. Slavnov and S. A. Frolov 880 360
Higgs Potentials as "Inheritance" from Higher Space-Time Dimensions. II. Construction of Higgs Models — I. P. Volobuev and Yu. A. Kubyshin 885 368
Quaternion Gauge Fields. Pseudocolor — A. B. Govorkov 893 381
O(4)-Invariant Solutions in Yang-Mills Theory with Scalar Field — V. A. Yatsun 901 392
Particle Capture by a Slowly Varying Periodic Potential — A. N. Vasil'ev and M. A. Guzev 907 401
One-Dimensional Lattice Dynamics of Hydrogen Bonded Systems — A. V. Zolotaryuk 916 415
Loop Renormalization of the Ginzburg-Landau Functional in the Theory of Phase Transitions — A. A. Lisyanskii and A. É. Filippov 923 425
Transmission of Waves and Particles through Long Random Barriers — A. V. Marchenko and L. A. Pastur 929 433
Behavior of a Superradiance Pulse with Allowance for Inhomogeneous Line Broadening — N. N. Bogolyubov (Jr), A. A. Moldoyarov, Fam Le Kien, and A. S. Shumovskii 940 449
Coexistence of Spin Glass Phase with Ferromagnetism in the Sherrington-Kirkpatrick Model — M. I. Vladimir, L. A. Dogotar', and S. P. Kozhukhar' 948 461
Correlation Function of Currents in a One-Dimensional Bose Gas — V. E. Korepin and N. A. Slavnov 955 471

Volume 69, Number 1 October, 1986

Nonconservation of the Fermion Number in a Cold Dense Fermion Medium in V-A Gauge Theories — V. A. Matveev, V. A. Rubakov, A. N. Tavkhelidze, and V. F. Tokarev 961 3
Thermal Properties of Quantum Electrodynamics in 2 + 1 Dimensions and Confinement — M. Yu. Novikov, A. S. Sorin, V. Yu. Tseitlin, and V. P. Shelest 977 25
Complete Asymptotic Representation of an Electromagnetic Pulse in a Long Two-Level Amplifier — S. V. Manakov and V. Yu. Novokshenov 987 40
Exact Solution of Quasipotential Equations of General Form with Chromodynamic Interaction — E. A. Dei, V. N. Kapshai, and N. B. Skachkov 997 55
Fock Representation for Quaternion Fields — A. B. Govorkov 1007 69
Complete Bosonization of Quark Currents in Quantum Chromodynamics — A. A. Andrianov and Yu. V. Novozhilov 1013 78
Ground-State Energy and Probability Distribution in a Nonlocal Quantum Mechanical Problem — Augusto González Garciá 1016 82
Effects of Coulomb Interaction in Relativistic N/D Equations with Allowance for Inelasticity — A. N. Safronov 1020 88
Model of Resonance Scattering of Composite Particles — Yu. A. Kuperin, K. A. Makarov, and B. S. Pavlov 1028 100
Derivation of an Expression for a Hamiltonian Functional Integral in Theories with First and Second Class Constraints

	Engl.	Russ.
— V. V. Nesterenko	1038	115
Smoluchowski Diffusion in an Infinite System at Low Density: Local Time Evolution — V. I. Skripnik	1047	128
Exact Calculation of the Current in the Tunnel Hamiltonian Method — Yu. A. Genenko and Yu. M. Ivanchenko	1056	142
Critical Properties of a System near an Angle Boundary — R. Z. Bariev	1061	149
On the Theory of Periodic Solutions of the Stationary Landau-Lifshitz Equation — V. G. Bar'yakhtar, I. A. Leonov, and T. K. Soboleva	1063	152
Masses of Vector and Pseudoscalar Mesons in the Quark Loop Model — M. K. Volkov and A. N. Ivanov	1066	156

Volume 69, Number 2 November, 1986

Exceptional Solutions to the Bethe Ansatz Equations — L. V. Avdeev and A. A. Vladimirov	1071	163
Evolution of Solitonless Wave Packets in the Nonlinear Schrödinger Equation and the Korteweg-de Vries Equation with Dissipative Perturbations — B. A. Malomed	1079	175
Modulation Instability and Periodic Solutions of the Nonlinear Schrödinger Equation — N. N. Akhmediev and V. I. Korneev	1089	189
Effective Action for Supersymmetric Chiral Anomaly — V. V. Krivoshchekov and L. O. Chekhov	1093	195
Solution of Constraints of Supergauge Theory in the Harmonic SU(2)/U(1) Superspace — B. M. Zupnik	1101	207
Action for "Generalized" Superstring with Torsion — S. V. Ketov	1106	214
One- and Two-Particle Wave Functions of Multihadron Systems — A. G. Grozin	1109	219
SU(6) Limit of the Quasiparticle—Phonon Nuclear Model — V. V. Voronov and G. Kyrchev	1121	236
Debye Screening in Spatially Inhomogeneous Systems of Charged Particles. I. Model of Spherical Insulator — A. I. Pilyavskii and A. L. Rebenko	1127	245
Potential of Gibbs Measure Corresponding to Steady Solution of the BBGKY Hierarchy for Nonfinite Interaction — I. Yu. Musina	1137	259
Unusual Analytic Properties of Some Lattice Models: Complement of Lee-Yang Theory — S. B. Shlosman	1147	273
Functional Integral Method for Investigating the Dynamics of a Dicke Type Model — S. A. Fedotov and M. B. Shirshov	1151	279
Critical Behavior of a Plane Ising Antiferromagnet with Two-Dimensional Dipole Interaction — G. V. Matvienko	1156	287
Quantum Creation of Fermions in a Hot Universe — U. Gyunter and A. I. Zhuk	1164	298
Rational Solitons of the Veselov-Novikov Equations Are Reflectionless Two-Dimensional Potentials at Fixed Energy — P. G. Grinevich	1170	307
One-Dimensional Supersymmetric Quantum Mechanics with $N \geq 2$ — A. I. Pashnev	1172	311
Gluon Bremsstrahlung in Supersymmetric Quantum Chromodynamics — Ya. Z. Darbaidze, V. A. Matveev, Z. V. Merebashvili, and L. A. Slepchenko	1175	316

Volume 69, Number 3 December, 1986

Does General Relativity Explain Gravitational Effects? — A. A. Logunov, Yu. M. Loskutov, and Yu. V. Chugreev	1179	328
Evolution of the Universe in the Relativistic Theory of Gravitation — A. A. Vlasov and A. A. Logunov	1188	341
Ranging of a Geostationary Satellite and Nongeodesic Motion of the Earth's Center of Mass — Yu. V. Chugreev	1193	348

Violation of the Determinacy Principle for Nonstationary Equations of Two- and Three-Dimensional Gas Dynamics for Sufficiently Large Reynolds Numbers — V. P. Maslov 1202 361
Bosonization in Models of Technicolor Type — Yu. V. Novozhilov 1212 379
Interpretation of Single-Particle Singularity in Multiple Scattering Processes — É. P. Garsevanishvili, B. V. Medvedev, and V. P. Pavlov.... 1220 391
Dependence of the Quasipotential on the Total Energy of a Two-Particle System — V. N. Kapshai, V. I. Savrin, and N. B. Skachkov..... 1226 400
Multidimensional Nonlinear Systems — M. V. Savel'ev 1234 411
The Ensemble Equivalence Problem for Bose Systems (Nonideal Bose Gas) — V. A. Zagrebnov and Vl. V. Papoyan..... 1240 420
The Method of Two-Time Green's Functions in the Molecular Hydrodynamics of a Superfluid — Yu. A. Tserkovnikov..... 1254 439
On the Inverse Problem for the Scattering Theory of Charged Particles when there is a Linear Relationship Between the Energy, the Square of the Orbital Angular Momentum, and the Coulomb Coupling Constant — M. N. Popushoi..... 1272 466
Generalized Darboux–Crum–Krein Transformations — I. V. Poplavskii..... 1278 475
